SUMMARY

Actively building a career portfolio around Python, AI/ML, and LLM-based applications, with a focus on translating real-world problems into practical technical solutions.

SKILLS

Programming: Python, C++, C

AI / ML: Artificial Intelligence, Machine Learning, NLP

Core CS: Data Structures & Algorithms, OOP, Computer Networks, DBMS, Software Engineering

Tools & Platforms: Git, GitHub, VS Code

Web / APIs: HTML, CSS, API Integration

Other: Problem Solving, Technical Presentation, Project Development

PROJECTS

Real-Time Glucose Monitoring System

03-2026

- Developed a prototype for real-time glucose-related monitoring using the MAX30105 particle sensor for optical signal capture.
- Engineered signal-processing logic to extract meaningful biometric readings from raw sensor output.
- Integrated hardware components, including sensor wiring and microcontroller interfacing, for stable data acquisition.
- Documented the system flow, architecture, and testing outcomes to support reproducibility.

Tech Stack: MAX30105 Sensor, Signal Processing, Embedded Systems, Hardware Integration

CodeVault – Full-Stack Personal Code Management Platform | [GITHUB](#)

06-2026

- Built a full-stack platform enabling developers to store, organize, and manage personal code snippets efficiently.
- Structured a clean separation between frontend, backend, and data layers for long-term maintainability.
- Enabled fast search and retrieval of saved snippets through categorized organization.
- Focused on practical usability, aligning the platform with real developer workflows.

Tech Stack: Python, API Integration, Web Development

Python Programming Tutorial / Learning Project | [YOUTUBE](#)

07-2026

- Created structured Python learning content covering variables, expressions, and conditionals for beginners.
- Authored progressive modules on loops, nested loops, and functions with hands-on examples.
- Explained object-oriented concepts, including classes and objects, through practical coding exercises.
- Curated file-handling exercises and problem sets to reinforce applied programming skills.

Tech Stack: Python

ACHIEVEMENTS

- Solved a wide range of mathematical and logical problems to strengthen analytical and reasoning skills.
- Tackled real-world challenges by designing practical, technology-driven solutions.
- Built websites addressing everyday real-life problems and use cases.
- Translated complex real-world problems into structured, workable technical solutions.

EDUCATION

Lovely Professional University

Punjab, India

Bachelor of Technology – Computer Science and Engineering (Artificial Intelligence & Machine Learning); Graduated
